

DUAL A-COIL BALLISTIC NYLON SAFETY CURTAIN & PRESSURE DECAY SMARTSTATION

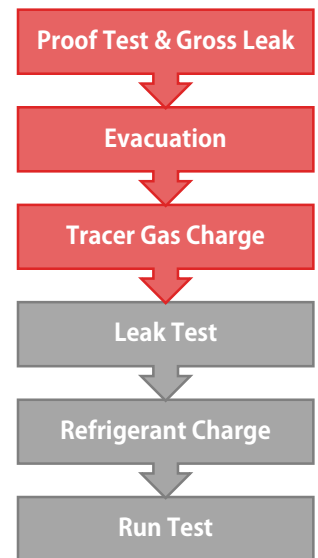

Specifications

- **Product:** Aluminum & Copper A-Coils
- **Two Independent Manifolds**
- **Proof Gas:** Nitrogen
 - **Proof Pressure:** 350 psig
- **Tracer Gas:** Helium
- **TAKT Time:** 90 seconds
- **Pre-Charged:** Yes
- **Pump Size:** 5.6 CFM
- **Installation Date:** 2019

VTI's Dual Safety Curtain & Pressure Decay SmartStation is engineered to provide a safely contained pressure decay test, evacuation, and tracer gas charge for A-Coils.

This durable vertical-rise ballistic curtain allows for easy, single operator use. Testing pressures vary from 200 psig to 350 psig to accommodate different specifications per customer request. After the Pressure Decay Test, the unit is evacuated and then charged with customer requested tracer gas for subsequent leak testing.

The control system is integrated with the customer's database to provide real time data. It is also interlocked with other equipment on the production line to guarantee testing requirements are met in production.

Other Test Systems Available.
